Company Description

SEEK's portfolio of diverse businesses make a positive impact on a truly global scale. Our purpose is to help people live more fulfilling and productive working lives and help organisations succeed. We create world-class technology solutions to connect more people to relevant employment, education, small business and volunteer opportunities.

We have a culture of high-performance in our workplaces and celebrate the diversity of our employees who contribute to the success of our organisation.

Job Description

SEEK is looking for a well-rounded Security Analyst with a primary focus on Security Operations. In this role, you will join a talented, highly collaborative team working to reduce risk across the company. You will contribute to the development and execution of SEEK's overall Cyber Security strategy, focusing on monitoring and responding to security threats, ensuring the safety and security of SEEK and its customers.

- Perform real-time monitoring and investigation of security alerts raised by different security systems
- Assist in improving configurations of security systems to ensure these are operating effectively
- Respond to and assist in security incidents and security-related requests/cases
- Be part of an on-call roster once a month
- Assist in reporting security metrics
- Assist in security awareness and training initiatives
- Inspire and support a security culture across the organisation to ensure security, trust and privacy are embedded in our ways of working.

The Team

SEEK's Cyber Security team is multi-disciplinary with a wide variety of security skills and responsibilities across a broad range of areas. While we do have separate security sub-teams, we have adopted a focus on cross-functional security expertise development, allowing team members to continue to grow professional expertise proficiency in a wide range of security concentrations.

Team members are empowered to identify security control gaps or risks within the organisation and work toward effective mitigation. We have executive support, and you will have the ability to influence the security posture of our staff helping progress SEEK's purpose of helping people live more fulfilling and productive working lives and helping organisations succeed.

Qualifications

- 2+ years of experience in performing security monitoring, investigation of security alerts and responding to security incidents
- Operational knowledge of endpoint protection, email filtering, enterprise firewalls, WAF (Web Application Firewall), IPS/IDS, CASB (Cloud Application Security Broker), SOAR (Security Orchestration and Automation Response), and SIEM (Security Information Event Management)
- Working knowledge of securing operating systems (Windows, macOS, Linux) and network infrastructure (routers, switches)
- Excellent stakeholder engagement and relationship building.

- Familiarity with the different security frameworks and standards

Desirable

- Development/Scripting skills in Python and PowerShell
- Passion for continued professional development and ongoing learning.
- Professional information security related certifications.
- Experience working in a DevOps environment on AWS (Amazon Web Services) platforms and services.

Additional Information

A sample of some of the perks & benefits we offer are:

- Employee Share Purchase Plan
- Flexible leave offerings, including opportunities to purchase additional leave
- Support of flexible working
- SEEKer Support, offering mental/physical wellbeing counselling

Here at SEEK we pride ourselves on harbouring a flexible and inclusive working environment. Should you require any specific supports or adjustments throughout the recruitment process and beyond, please advise us and we will be happy to assist.

For this role, only those candidates with the eligible right to work will be considered
